

Take the Next Step in Your Health Care Future!

Carrington College offers a unique opportunity with the Health Information Technology (HIT)¹ Associate of Science Degree² program to career-minded learners who have already earned a Medical Billing and Coding certificate. As part of this degree path, you may be able to apply credits from your Medical Billing and Coding certificate. Although most courses for this program are delivered in an online format, students are required to complete a 90-hour Health Information Practicum in an approved health care setting.

Careers in Health Information Technology:

Health Information Technicians organize, process and maintain medical records and data for clinics and hospitals while following ethical, legal and regulatory requirements required by the health care system.

They perform a variety of duties including:

- Review of records for accuracy
- Quality and compliance maintenance
- Security and confidentiality of the patients health information
- Utilize coding systems for patient diagnosis and treatment

This career path can lead to employment in a variety of health care environments such as:

- Physicians' offices
- Administrative and support services
- State, local and private hospitals
- Nursing care facilities

¹The degree is awarded from the Sacramento campus.

²While some employers may not require this level of education, it can help better prepare you for the responsibilities of this role.
