MEDICAL ASSISTING

Chart A Better Future.

Whether it's working in a medical clinic, private practice or hospital, medical assistants help keep operations running smoothly and efficiently. Their duties vary from place to place, but they typically help doctors by performing basic clinical procedures and handling some administrative duties.

The Medical Assisting program at Carrington College® is made up of three educational areas: Clinical, Administrative and Externship. Professionalism, client relations, critical thinking, adherence to ethical and legal requirements and proper communication are among the skills we emphasize. Graduates of the Mesquite campus Medical Assisting program are prepared to sit for the national certification exam to attain the Registered Medical Assistant (RMA) credential.†

The program culminates in a Certificate of Achievement.

According to the U.S. Bureau of Labor Statistics, employment of medical assistants is expected to grow 29% from 2012-2022.‡

* Program availability varies by location. Carrington College reserves the right to update information as it becomes available. Information is current at the time of printing. For the most updated information, visit carrington.edu.

† Carrington College prepares students to take appropriate certification and licensure exams related to their individual majors. The College does not guarantee graduates will successfully pass these exams or be certified or licensed as a result of completing the program. There are multiple certification opportunities available in the Medical Assisting field, the most recognized of which are the Registered Medical Assistant (RMA) credential and the Certified Medical Assistant (CMA) credential. Credential preparation varies by location.
